DATE OF CONTENT 11 October 1950

25X1 DATE OBTAINED [redacted] DATE PREPARED 6 November 1950

REFERENCES

PAGES 1 ENCLOSURES (NO. & TYPE)

REMARKS

25X1 [redacted]

1. Four jet fighters painted silver were standing in the southeastern corner of Neubrandenburg-Trollenhagen (N 54/U 67) airfield. Six gray-green jet fighters, five single-engine, low-wing monoplanes and three type U-2 biplanes were in front of the hangars. The jet fighters were all of the same type, had swept-back wings and high-set rudder assemblies. Their noses were painted red.* The single-engine planes were fitted with a radial engine, a rudder assembly, the leading edge of which was slanting upward to the rear while the trailing edge was almost perpendicular. The rear of the fuselage projected beyond the rudder assemblies. **

2. There was no flying between 4 and 5:30 p.m. There was a strong northwesterly wind and moderate visibility. No activities were noticed at the field. The hangars seem to have been repaired and are believed to be suitable for the housing of aircraft during the winter.

25X1 * [redacted] Comment. The report confirms the occupation of the airfield by MIG-15 jet planes. The exact number of such planes stationed in Neubrandenburg-Trollenhagen is not known. According to other information a fighter regiment is believed to be stationed at the field.

25X1 ** [redacted] Comment. These descriptive data are too scanty for a determination of the type. It is believed that the planes were of type YAK-11.
